Metal Tip Applicators: Packaging with a Luxe Edge

Packaging with metal applicators and metal rollerballs have long been a staple in the wellness industry. Metal tip mania is now spreading for a wider range of beauty and skin care formulations, for the eyes and lips - such as concealers, blemish treatments and serums.

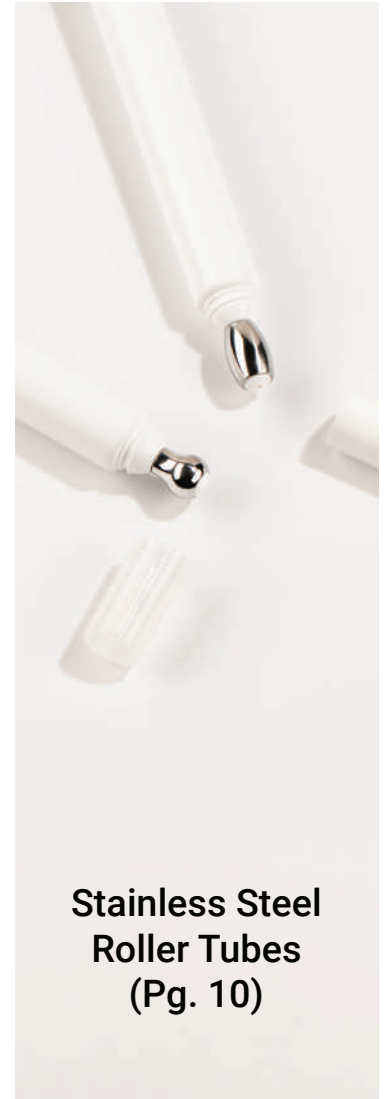

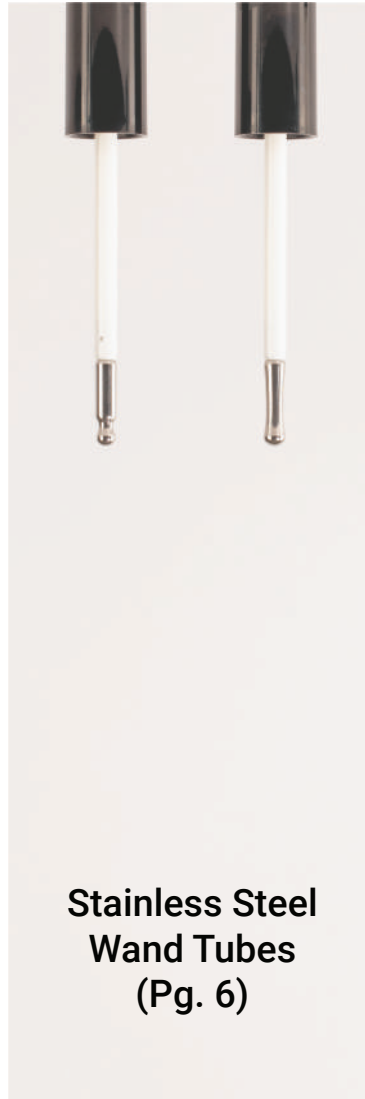

Premium metal tip applicators and rollers not only instantly upgrade your packaging, but they also provide many benefits:

- Self-cooling metal tips help awaken the skin on application
- Provide soothing, cooling, invigorating and massaging effects
- Hygienic, they are easily cleaned and reused
- Delivering just the right amount of formulation with no waste or build-up in the applicator

ICONS|ICS has several new metal tip and metal roller packaging available. Many of our newest innovations are featured on the next pages.
