WHY CHOOSE MONO MATERIAL?

Mono-material packaging contains only one type of material. They can easily be recycled, reused, and repurposed, giving the product a longer life cycle. ICONS|ICS has a growing selection of beauty packaging available, made with 100% PP, PE or PET. We work closely with our clients to ensure material selection, pack functionality and appearance go hand in hand with their concept and formulation.

When mono-material packaging is not available, ICONS|ICS also offers packaging that can be easily disassembled and recycled by the end consumer.
